# Product End-of-Life Disassembly Instructions

## Purpose
The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of HP products to remove components and materials requiring selective treatment, as defined by EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

## 1.0 Items Requiring Selective Treatment

1.1 Items listed below are classified as requiring selective treatment.

1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

<table>
<thead>
<tr>
<th>Item Description</th>
<th>Notes</th>
<th>Quantity of items included in product</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printed Circuit Boards (PCB) or Printed Circuit Assemblies (PCA)</td>
<td>With a surface greater than 10 sq cm</td>
<td>2</td>
</tr>
<tr>
<td>Batteries</td>
<td>All types including standard alkaline and lithium coin or button style batteries</td>
<td>1</td>
</tr>
<tr>
<td>Mercury-containing components</td>
<td>For example, mercury in lamps, display backlights, scanner lamps, switches, batteries</td>
<td></td>
</tr>
<tr>
<td>Liquid Crystal Displays (LCD) with a surface greater than 100 sq cm</td>
<td>Includes background illuminated displays with gas discharge lamps</td>
<td></td>
</tr>
<tr>
<td>Cathode Ray Tubes (CRT)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Capacitors / condensers (Containing PCB/PCT)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Electrolytic Capacitors / Condensers measuring greater than 2.5 cm in diameter or height</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td>External electrical cables and cords</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Gas Discharge Lamps</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Plastics containing Brominated Flame Retardants weighing &gt; 25 grams (not including PCBs or PCAs already listed as a separate item above)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Components and parts containing toner and ink, including liquids, semi-liquids (gel/paste) and toner</td>
<td>Include the cartridges, print heads, tubes, vent chambers, and service stations.</td>
<td></td>
</tr>
<tr>
<td>Components and waste containing asbestos</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

PSG instructions for this template are available at [EL-MF877-01](#).
Components, parts and materials containing refractory ceramic fibers

Components, parts and materials containing radioactive substances

1.3 Markings for plastic parts greater than 25 grams

</tbody>
</table>

3.0 Product Disassembly Process

3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment:

1. SYSTEM BOARD

1.1 Remove the access panel:

a) Remove the two screws that secure the access panel to the computer chassis. (see Figure 1 below)

b) Lift the panel off the unit. (see Figure 2 below)

1.2 Disconnect the data cables from the board.(see Figure 3-7 below)

a) Disconnect the speaker cable and system fan cables from the board.

b) Disconnect the ODD cable and HDD cable from the board.

c) Disconnect the power switch cable and Card reader cable from the board.
1.3 Remove the front chassis fan. (see Figure 8-10 below)

a) Remove the cables from the top of the fan cover.

b) Pull the handle on the fan cover next the HDD cage.

c) Rotate the fan cover and lift it off the unit.

1.4 Remove the Memory. (see Figure 11 below)

1.5 Remove the processor from the system board: (see Figure 12-14 below)

a) Loosen the clip that secures the heat sink to the system board.

b) Lift the heat sink from atop the processor and set it on its side to keep from contaminating the work area with thermal grease.

c) Rotate the handle and lift the processor from the socket.

d) Restoration the socket handle.

1.6 Remove the system board: (see Figure 15&16 below)

a) Remove the screws that secure the system board to the chassis.

b) Lift the system board towards then remove it.

2. BATTERY

2.1 Release the battery from its holder, squeeze the metal clamp that extends above one edge of the battery. Then the battery pops up, lift it out. (see Figure 17 below).

3. SYSTEM DRIVERS

3.1 Remove the HDD.(see Figure 18&19 below)

a) Remove the cables connect to the HDD.

b) Pull the handle and lift the HDD off the unit.

3.2 Remove the ODD.(see Figure 20-26 below)

a) Remove the cables connect to the ODD.

b) Pull outward on all three tabs on the left side of the front bezel.

b) Rotate the bezel off the chassis.

d) Lift the handle and pull the ODD out of the ODD cage.
3.3 Remove the shielding. (see Figure 27&28 below)
   a) Turn handle on the top of the shielding.
   b) Remove the shielding.

3.4 Remove the rear chassis fan. (see Figure 29&30 below)
   a) Remove the screws.
   b) Take off the fan from the unit.

3.5 Remove the front I/O. (see Figure 31&32 below)
   a) Remove the screw.
   b) Rotate the Front I/O and pull it out of the chassis.

3.6 Remove the speaker. (see Figure 33&34 below)
   a) Remove the screw.
   b) Left the speaker and pull it out of the chassis.

3.7 Remove the power on/off switch. (see Figure 35&36 below)
   a) Extrusion the bottom of the switch.
   b) Pull the switch out of the chassis.

4. POWER SUPPLY

4.1 Take off the power supply: (see Figure 37&38 below)
   a) Remove the four screws that secure the power supply to the chassis. (see Figure 8 below)
   c) Press the baffle and slide the power supply toward the front of the computer, then lift it out of the chassis. (see Figure 9 below)

4.2 Remove the cover from the power supply: (see Figures 39-41 below)
   a) Using a phillips screwdriver, remove the four screws that secure the cover to the power supply chassis.
   b) Cut the plastic cable clamp that secures the cables to the cover.
   c) Lift the cover off the power supply.

4.3 Remove the power supply PCA: (see Figure 42-44 below)
   a) Remove the four screws that secure the power supply PCA to the chassis. (see Figure 14 below)
b) Using Soldering Iron, heat the solder of the cables which connect to the PCA, then remove the cables. (see Figure 15&16 below)

c) Remove the power supply PCA from the power supply chassis.

4.4 Remove the Electrolytic Capacitors: (see Figure 45&46 below)

a) Using Soldering Iron, heat the solder of Electrolytic Capacitors.

b) Remove the Electrolytic Capacitors.
