# Product End-of-Life Disassembly Instructions

**Product Category:** Personal Computers

**Marketing Name / Model**
[List multiple models if applicable.]

HP EliteDesk 880 G1 Small Form Factor Business PC

---

**Purpose:** The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of HP products to remove components and materials requiring selective treatment, as defined by EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE)

## 1.0 Items Requiring Selective Treatment

1.1 Items listed below are classified as requiring selective treatment.
1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

<table>
<thead>
<tr>
<th>Item Description</th>
<th>Notes</th>
<th>Quantity of items included in product</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printed Circuit Boards (PCB) or Printed Circuit Assemblies (PCA)</td>
<td>With a surface greater than 10 sq cm PCA</td>
<td>3</td>
</tr>
<tr>
<td>Batteries</td>
<td>All types including standard alkaline and lithium coin or button style batteries</td>
<td>Yes</td>
</tr>
<tr>
<td>Mercury-containing components</td>
<td>For example, mercury in lamps, display backlights, scanner lamps, switches, batteries</td>
<td></td>
</tr>
<tr>
<td>Liquid Crystal Displays (LCD) with a surface greater than 100 sq cm</td>
<td>Includes background illuminated displays with gas discharge lamps</td>
<td></td>
</tr>
<tr>
<td>Cathode Ray Tubes (CRT)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Capacitors / condensers (Containing PCB/PCT)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Electrolytic Capacitors / Condensers measuring greater than 2.5 cm in diameter or height</td>
<td>Liteon 320W STD PSU</td>
<td>5</td>
</tr>
<tr>
<td>External electrical cables and cords</td>
<td>Yes</td>
<td>1</td>
</tr>
<tr>
<td>Gas Discharge Lamps</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Plastics containing Brominated Flame Retardants weighing &gt; 25 grams (not including PCBs or PCAs already listed as a separate item above)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Components and parts containing toner and ink including liquids, semi-liquids (gel/paste) and toner chambers, and service stations.</td>
<td>Include the cartridges, print heads, tubes, vent</td>
<td></td>
</tr>
<tr>
<td>Components and waste containing asbestos</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

PSG instructions for this template are available at [EL-MF877-01](#)
2.0 Tools Required

List the type and size of the tools that would typically be used to disassemble the product to a point where components and materials requiring selective treatment can be removed.

<table>
<thead>
<tr>
<th>Tool Description</th>
<th>Tool Size (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>#1 Torx Screwdriver</td>
<td>T-15</td>
</tr>
<tr>
<td>#2 Phillips Screwdriver</td>
<td>2</td>
</tr>
<tr>
<td>#3 Micro shear</td>
<td>170II</td>
</tr>
</tbody>
</table>

3.0 Product Disassembly Process

3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment:

1. Remove the access panel (see Figure 1 below)
2. Disconnect the cables from the board (see Figure 2-7 below)
3. Remove the HDD, slim ODD, ODD from cage (see Figure 8-10 below)
4. Remove the Memory from the board (see Figure 11 below)
5. Remove the CPU HeatSink from the board (see Figure 12 & 13 below)
6. Remove the fan from CPU HeatSink (see Figure 14 & 15 below)
7. Remove the CPU from the board (see Figure 16 & 17 below)
8. Remove the battery from the system board (see Figure 18 below)
9. Remove stone card from chassis (see Figure 19 & 20 below)
10. Remove M/B from chassis (see Figure 21 & 22 below)
11. Remove system fan from chassis (see Figure 23 & 24 below)
12. Remove PSU from chassis (see Figure 25 - 27 below)
13. Remove Speaker from chassis (see Figure 28 & 29 below)
14. Remove front bezel (see Figure 30 below)
15. Remove Front I/O and power LED cable (see Figure 31 - 33 below)
16. Remove PSU cover (see Figure 34 & 35 below)
17. Remove PSU PCA, and disconnect power cables (see Figure 36 & 37 below)
18. Remove the Electrolytic Capacitors (see Figure 38 - 40 below)

3.2 Optional Graphic. If the disassembly process is complex, insert a graphic illustration below to identify the items contained in the product that require selective treatment (with descriptions and arrows identifying locations).
