**Product End-of-Life Disassembly Instructions**

**Product Category: Personal Computers**

**Marketing Name / Model**
[List multiple models if applicable.]

HP EliteOne 800 G1 All-in-One Business PC

**Purpose:** The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of HP products to remove components and materials requiring selective treatment, as defined by EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

**1.0 Items Requiring Selective Treatment**

1.1 Items listed below are classified as requiring selective treatment.
1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

<table>
<thead>
<tr>
<th>Item Description</th>
<th>Notes</th>

Description #5

3.0 Product Disassembly Process

3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment:

1. 2.1 Description of the sample submitted for assessment
2. 2.2 Assessment Method
3. 2.3 Description of the disassembly sequences
4. 2.4 Summary of disassembly assessment
5. 2.5 Photo of Disassembly Components
6. 7. 8.

3.2 Optional Graphic. If the disassembly process is complex, insert a graphic illustration below to identify the items contained in the product that require selective treatment (with descriptions and arrows identifying locations).

Test conducted

2.1 Description of the sample submitted for assessment
Test conducted
2.2 Assessment Method

The submitted sample is disassembled into different parts by using ordinary tools. Similar materials from each part were grouped and weighed. The recycling and recovery rates were calculated based on the treatment requirements as set up in the WEEE directive, followed by the status quo of best available technology for recycling and recovery technology available in Europe as well as Taiwan. Materials for which currently no recycling technology is available or where the recycling is not economically feasible, or which contain hazardous substances, are assumed to be disposed in landfills without further use.

Test conducted

2.3 Description of the disassembly sequences
Disassembly process

Separate the panel by loosening 4 screws.

Separate the connector socket by loosening 4 screws.

Separate the plastic cover of connector socket.

Remove the plastic washer from metal base.

Separate the metal base by loosening 16 screws.

Tear off the rubber pads from base.

Separate the plastic cover of base.

Separate the metal support by loosening 12 screws.

Separate the plastic cover of hinge.

(To be continued)

Test conducted
Disassembly process
(Cont’d).

- Personal Computer
(Support)

Loosen 10 screws from cover of hinge.

Separate the plastic cover of support.

Separate cover of hinge by loosening 4 screws of support cover and 2 screws of metal support.

Completed disassembly.

Separate the cover of base.

Separate the cover of hinge.

Test conducted
Disassembly process

- Personal Computer (Frame)

Take off the connector cover.

Push out the rear cover.

Separate the metal sheet from rear cover

Separate the side covers.

Separate the rear cover by loosen 1 screw.

Remove the locks from rear cover.

Separate the metal sheet from side cover.

Separate the panel by loosening 15 screws.

Separate the frame of panel.
(To be continued)

Completed disassembly.

Test conducted
Test conducted
Disassembly process - Personal Computer (Mainboard)

(Cont’d).

Separate heat sink by loosening 6 screws.

Take off the heat sink.

Separate CPU and frame by loosening 3 screws.

Take off the heat sink.

Separate WAL by loosening 1 screw.

Separate display board by loosening 2 screws.

Take off the RAM.

Separate card edge by loosening 2 screws.

Take off the battery.

(To be continued)

Test conducted
Disassembly process (Cont’d).

Separate Mainboard by loosening 10 screws.

Separate connector and metal part by loosening 3 screws.

Separate metal cover by loosening 4 screws.

Completed disassembly.

Remove the tapes and pad.

Test conducted
Disassembly process

- Personal Computer

(Panel )

Separate the cable.

Tear off tape.

Separate the metal frame.

Separate the plastic film.

Tear off tape from plastic frame.

Separate the plastic frame by loosening 2 screws.

Take off the LED.

LED

Take off PCB assembly.

Completed disassembly.

Test conducted

PSG instructions for this template are available at EL-MF877-01
Disassembly process

- Tear off stickers and pads.
- Take off the cover of battery box.
- Open the case by loosening 2 screws.
- Separate the metal contacts from battery box and PCB assembly.
- Take off the PCB assembly.
- Take off the wheel.
- Separate the housing.
- Completed disassembly.

Test conducted

PSG instructions for this template are available at EL-MF877-01
Disassembly process

- Tear off stickers and pads.
- Take off the cover of battery box.
- Open the case by loosening 14 screws.
- Take off the metal rod.
- Take off the buttons.
- Take off the middle frame.
- Take off the rubber pad.
- Separate PCB assembly by loosening 3 screws.
- Cut off the cable.
- Completed disassembly.

Test conducted

PSG instructions for this template are available at EL-MF877-01
Disassembly process

- Personal Computer

(Recorder)

Tear off sticker.

Open the housing.

Separate the LER indicator.

Completed disassembly.

Separate the metal parts of lack.

Separate the USB jack.
