# Product End-of-Life Disassembly Instructions

**Product Category:** LaserJet Printers  

**Marketing Name / Model**  
[List multiple models if applicable.]

- HP Color LaserJet 3700/Q1321A
- HP Color LaserJet 3700n/Q1322A
- HP Color LaserJet 3700dn/Q1323A
- HP Color LaserJet 3700dtn/Q1324A

**Purpose:** The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of HP products to remove components and materials requiring selective treatment, as defined by EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

## 1.0 Items Requiring Selective Treatment

1.1 Items listed below are classified as requiring selective treatment.  
1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

| Batteries                                             | All types including standard alkaline and lithium coin or button style batteries | 0 |
| Mercury-containing components                         | For example, mercury in lamps, display backlights, scanner lamps, switches, batteries | 0 |
| Liquid Crystal Displays (LCD) with a surface greater than 100 sq cm | Includes background illuminated displays with gas discharge lamps | 0 |
| Cathode Ray Tubes (CRT)                               | [not present]                                                        | 0 |
| Capacitors / condensers (Containing PCB/PCT)          | [not present]                                                        | 0 |
| Electrolytic Capacitors / Condensers measuring greater than 2.5 cm in diameter or height | 1 |
| External electrical cables and cords                  | - power cord                                                         | 1 |
| Gas Discharge Lamps                                   | [not present]                                                        | 0 |
| Plastics containing Brominated Flame Retardants       | Plastic parts installed in close proximity to heating/fusing units and paper path parts contain brominated flame retardants. Further, industry standard parts including fans, motors, cables, connectors, wiring and printed circuit boards also typically contain these flame retardants. | molded plastic |

3.0 Product Disassembly Process

3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment:

1. Remove toner cartridges and toner waste containers, if applicable.
2. Remove the outer housing skins and sort according to markings.
3. Disassemble the chassis using appropriate tools and set aside items requiring selective treatment.
4.  
5.  
6.  
7.  
8.  

3.2 Optional Graphic. If the disassembly process is complex, insert a graphic illustration below to identify the items contained in the product that require selective treatment (with descriptions and arrows identifying locations).
