# Product End-of-Life Disassembly Instructions

**Product Category:** Monitors and Displays

**Marketing Name / Model**
[List multiple models if applicable.]

| HP Pavilion 22xig IPS Monitor |

**Purpose:** The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of HP products to remove components and materials requiring selective treatment, as defined by EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

## 1.0 Items Requiring Selective Treatment

1.1 Items listed below are classified as requiring selective treatment.

1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

<table>
<thead>
<tr>
<th>Item Description</th>

3.0 Product Disassembly Process
3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment:

1. Quick release Base stand
2. Strip the screws from rear cover so that the rear metal cover can be removed, after be turn back
3. Strip the five screws from panel holder
4. Push up and disassemble the cover from the panel
5. To remove the shielding(contain the other material)
6. Strip the screws
7. Release all materials and put some by ESD

3.2 Optional Graphic. Depending upon the complexity of the disassembly process, a graphic depicting the locations of items contained within the product which require selective treatment (with descriptions and arrows identifying locations) can be inserted below:
Step 1 Quick release Base stand

(1). Pull out base and stand

a. Press black button with one hand
b. Pull out stand & base with another hand

(2). Disass'y base and stand

Press this **Plastic Parts, then release base**
Step 2: Strip the screws from rear cover so that the rear metal cover can be removed, after being turned back.

Step 3: Strip the five screws from panel holder; such as below;

Step 4: Push up and disassemble the cover from the panel;
Step 5: To remove the shielding (contain the other material);

(4.1) Remove the acetate tapes covering the LVDS/ LED FFCs;

(4.2) Pull out the LVDS/ LED FFCs to separate the base assembly from the unit;
Step 6: Strip the screws *8pcs
Step 7: Release all materials and put some by ESD;

Can follow the picture as bellow;

The overall look when finished
