# Product End-of-Life Disassembly Instructions

## Product Category: Multi-functional Devices

### Marketing Name / Model
[List multiple models if applicable.]

- HP Color LaserJet CM4730/CB480A
- HP Color LaserJet CM4703f/CB481A
- HP Color LaserJet CM4730fsk/CB482A
- HP Color Laserjet CM4730fm/CB483A

**Purpose:** The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of HP products to remove components and materials requiring selective treatment, as defined by EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

## 1.0 Items Requiring Selective Treatment

1.1 Items listed below are classified as requiring selective treatment.
1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

| Item Description                                      | Notes                                                                 | Quantity of items included in product |
|-------------------------------------------------------|                                                                      |----------------------------------------|
| Printed Circuit Boards (PCB) or Printed Circuit       | With a surface greater than 10 sq cm CM4730 CM4730f CM4730fsk         | qty/model 9 10 12 13                   |
| Assemblies (PCA)                                      | CM4730fm                                                            |                                        |
| Batteries                                             | All types including standard alkaline and lithium coin or button style batteries For all models: Carbon monofluoride lithium coin cell on PCA | 1                                      |
| Mercury-containing components                         | For example, mercury in lamps, display backlights, scanner lamps, switches, batteries | 1                                      |
| Liquid Crystal Displays (LCD) with a surface greater  | Includes background illuminated displays with gas discharge lamps   | 1                                      |
| than 100 sq cm                                        |                                                                      |                                        |
| Cathode Ray Tubes (CRT)                               | [not present]                                                       |                                        |
| Capacitors / condensers (Containing PCB/PCT)          | [not present]                                                       |                                        |
| Electrolytic Capacitors / Condensers measuring        | [no need to identify the location since normally will be attached to a PCB] | 3                                      |
| greater than 2.5 cm in diameter or height             |                                                                      |                                        |
| External electrical cables and cords                  | - power cord                                                        | 1                                      |
| Gas Discharge Lamps                                   | [not present]                                                       |                                        |
| Plastics containing Brominated Flame Retardants       | Plastic parts installed in close proximity to molded               |                                        |
heating/fusing units and paper path parts contain brominated flame retardants. Further, industry standard parts including fans, motors, cables, connectors, wiring and printed circuit boards also typically contain these flame retardants.

CM4730
CM4730f
CM4730fsk
CM4730fm

plastic parts; all motors, fans, connectors, wiring and PC boards

59
59
60

Components and parts containing toner and ink, including liquids, semi-liquids (gel/paste) and toner

Include the cartridges, print heads, tubes, vent chambers, and service stations.
- toner cartridge(s) - CMYK

4

Components and waste containing asbestos

[not present]

Components, parts and materials containing refractory ceramic fibers

[not present]

Components, parts and materials containing radioactive substances

[not present]

2.0 Tools Required

List the type and size of the tools that would typically be used to disassemble the product to a point where components and materials requiring selective treatment can be removed.

3.0 Product Disassembly Process

3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment:

1. Remove toner cartridges and toner waste containers, if applicable.
2. Remove the outer housing skins and sort according to markings.
3. Disassemble the chassis using appropriate tools and set aside items requiring selective treatment.
4. 
5. 
6. 
7. 
8. 

3.2 Optional Graphic. If the disassembly process is complex, insert a graphic illustration below to identify the items contained in the product that require selective treatment (with descriptions and arrows identifying locations).
