- **HP 147X black** (W1470X)
- **HP 147Y black** (W1470Y)

for the HP LaserJet Enterprise (Flow) MFP M635 series

Original HP toner cartridges* for use with the HP LaserJet Enterprise (Flow) MFP M635 series** offer a wide variety of safety and environmental features. For this, HP considers own HP standards, requirements of mandatory regulations, and voluntary certification criteria. Main requirements are summarised in HP’s General Specification for the Environment (GSE). Accordingly, HP strongly recommends that users apply only original HP cartridges to ensure safe and sustainable operation of their HP printing system***.

**Firm precautions ensure safe products**

**EU and US classification** – HP toner mixtures used with HP LaserJet Enterprise (Flow) MFP M635 series printing systems are not classified as hazardous according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS)14 as well as the assessment criteria for mixtures in the European Union (Regulation (EC) No 1272/2008, as amended)15 and applicable requirements in the United States (OSHA CFR 1910.1200, as amended)16. Accordingly, they are neither classified nor labelled as toxic, carcinogenic, mutagenic, toxic to reproduction, sensitising or corrosive.

**REACH compliance** – HP is committed to meeting all applicable REACH requirements and providing customers with information about the chemicals in our products as needed to comply with REACH14 – including original HP toner cartridges for the HP LaserJet Enterprise (Flow) MFP M635 series.

**RoHS conformity** – Where countries apply materials restrictions on electrical and electronic equipment to toner cartridges (such as the European Union’s RoHS Directive 2011/65/EU), HP is committed to meeting all applicable materials restrictions and documentary requirements by the relevant deadlines.
GSE fulfilment – Original HP toner cartridges for the HP LaserJet Enterprise (Flow) MFP M635 series meet a variety of strict substances and materials restrictions according to our General Specification for the Environment (GSE). The GSE is a series of standards which defines HP’s global product environmental requirements, applies HP-wide, and contributes to our commitment to global citizenship.

Return and recycling instead of landfill disposal

Designed for recycling – Original HP toner cartridges are designed with a view to easy disassembly and a reduction of the number of parts used. Parts of original HP toner cartridges for HP LaserJet Enterprise (Flow) MFP M635 series printing systems greater than 25 grams in weight are marked with internationally recognised ISO symbols for ease of materials identification.

Original HP cartridge return options – HP helps you recycle your original HP cartridges—it’s easy and free with the HP Planet Partners programme available in more than 60 countries and territories around the world.[5]

Closed-loop recycling process – Original HP toner cartridges returned through HP Planet Partners go through a multiphase recycling process and are reduced to raw materials which can then be used to make new products, including original HP toner cartridges. You can be confident that original HP toner cartridges recycled through HP Planet Partners are never refilled, resold, or sent to a landfill.[6] Meanwhile, 100% of HP toner cartridges contain between 5-45% recycled content.[6]

External proof of sound performance

For meeting more than a hundred criteria, HP LaserJet Enterprise (Flow) MFP M635 series printing systems are certified with the internationally renowned Blue Angel eco label according to DE-UZ 205 (formerly RAL-UZ 205) in Germany.[7] This includes original HP toner cartridges and toners which are part of Blue Angel evaluation. Accordingly, these toners have to meet stringent restrictions for substances classified as carcinogenic, mutagenic to germ cells, or toxic to reproduction as intentionally added constituents. Also, they are required to not contain azo dyes that can release carcinogenic aromatic amines according to REACH Regulation[8], while organotin compounds, cobalt and nickel oxides content has to be as low as reasonably achievable. Photoconductor drums are required to not contain intentionally added selenium, lead, mercury or cadmium or any of their compounds as constituents.[8]

The HP LaserJet Enterprise Flow MFP M635z, the HP LaserJet Enterprise MFP M635fht, and the HP LaserJet Enterprise MFP M635h are certified with the Blue Angel eco label according to DE-UZ 205 in Germany.

Please note that relevant alternative eco labels for refilled and remanufactured toner cartridges do not require the same safety and environmental performance as the Blue Angel awarded for HP printing systems. In fact, they offer less and often significantly weaker criteria compared to those for HP printing systems and their toner cartridges.

Stringent requirements for suppliers and manufacturing

Original HP toners for the HP LaserJet Enterprise (Flow) MFP M635 series are manufactured following precisely defined formulations using only raw materials from carefully chosen and contracted suppliers in order to achieve high product quality. Manufacturing is conducted in production sites that are ISO certified (ISO 14001, environmental management system) and that include worldwide accepted ISO requirements in the quality management system (ISO 9001:2000, quality assurance in production) or an equivalent programme.
Indoor air quality performance

Check for potential substances and particles release

When original HP toner cartridges are used as intended to operate HP LaserJet Enterprise (Flow) MFP M635 series printing systems, emissions testing assessment shows compliance with relevant occupational and indoor air requirements. In addition, for HP LaserJet Enterprise (Flow) MFP M635 series printing systems, HP can confirm compliance with the strict criteria for substances and particles release of the German Blue Angel eco label. In detail, this includes potential release of TVOCs, benzene, styrene, unidentified VOCs, ozone and particles.

Don’t compromise on safety and the environment

If users want to be sure to get the safety and environmental performance outlined above, HP recommends operating the HP LaserJet Enterprise (Flow) MFP M635 series with original HP toner cartridges only.

Alternative non-HP products might significantly alter the behaviour of your HP printer. To ensure users can consider relevant safety and environmental aspects at any time, HP makes information on relevant assessment of original HP toner cartridges readily available.

Further details if you want to know more

In-depth information on your particular original HP toner cartridges for HP LaserJet Enterprise (Flow) MFP M635 series printing systems is listed in the following Safety Data Sheets (SDS) which are available on the HP website:

• SDS for HP toner cartridge HP 147A black – no. W1470A-X-Y-YC
• SDS for HP toner cartridge HP 147X black – no. W1470A-X-Y-YC
• SDS for HP toner cartridge HP 147Y black – no. W1470A-X-Y-YC

For HP LaserJet Enterprise (Flow) MFP M635 series printing systems certified with the Blue Angel eco label in Germany, Blue Angel user information documents also provide further details on the particular printing systems' environmental performance when operated with original HP toner cartridges. The documents can be accessed on the Blue Angel User Information documents subpage on the HP website, the Blue Angel website or by clicking the following links:

• Blue Angel user information for HP LaserJet Enterprise Flow MFP M635z
• Blue Angel user information for HP LaserJet Enterprise MFP M635fht
• Blue Angel user information for HP LaserJet Enterprise MFP M635h

More information on the Blue Angel and certified HP products is available on the Blue Angel section of the HP website.

* The listed HP toner cartridges comprise a selection from the region Europe, the Middle East, and Africa (EMEA). It might not be exhaustive.

** This series includes the following models: HP LaserJet Enterprise Flow MFP M635z, HP LaserJet Enterprise MFP M635fht, HP LaserJet Enterprise MFP M635h. Please note that there are HP printing systems which are available in certain geographies and/or for certain customer segments only.

*** HP printing systems comprise printer, print media, and original HP cartridges.

**** The compilation of the listed SDSs is not exhaustive and selected based on the following settings from the HP website: Germany/English (country/language).
