**Specific Hazards arising from the chemical:**
Special hazards arising from the substance or mixture

Battery may burst and release hazardous decomposition products when exposed to a fire situation. Lithium ion batteries contain flammable electrolyte that may vent, ignite and produce sparks when subjected to high temperature (>150°C (302°F)), when damaged or abused (e.g. mechanical damage or electrical overcharging); may burn rapidly with flare-burning effect; may ignite other batteries in clothes proximity.

**Specific protective actions for fire-fighters:**

---

### Section 6 - Accidental Release Measures

**Personal precautions:**
Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation.

**Protective equipment:**
No data available.

**Emergency procedures:**
Remove ignition sources, evacuate area. Sweep up using a method that does not generate dust. Collect as much of the spilled material as possible, placed the spilled material into a suitable disposal container. Keep spilled material out of sewers, ditches and bodies of water.

**Environmental precautions:**
Do not allow material to be released to the environment without proper governmental permits.

**Methods and materials for containment and cleaning up:**
All waste must refer to the United Nations, the national and local regulations for disposal. See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

---
